How to Make an Origami Tent adapted from **http://www.ehow.com/how_10008421_make-origami-tent.html#ixzz1emTJpdBu**

1. Cut the paper on the line above this text to form a square.

2. Place the printed side of the paper face down and fold the paper in half diagonally both ways. Do this by placing the top-left corner to the bottom-right corner and the top-right corner to the bottom-left corner.

3. Unfold the paper, and place the front side of the paper to face up. You will see crease lines running up from each corner to the center of the paper.

4. Fold the paper in half by placing the left edge on the right edge, then unfold it.

5. Hold the paper in your hand with the new crease line formed pointing left and right. Push in on the new crease line to help connect the opposite corners of the paper together. This creates a triangle shape.

6. Lift the top layer at the center of the bottom edge to touch the top of the triangle. Press down on the paper so that the rest of the edge lines up with the sides of the triangle and the corners sit at the bottom center.

7. Stand the tent upright and it's ready for use.
